PROCEEDINGS OF SPIE

Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXXI

Gerald C. Holst
David P. Haefner
Editors

27 April – 8 May 2020
Online Only, United States

Sponsored and Published by
SPIE

Volume 11406

Proceedings of SPIE 0277-786X, V. 11406

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXXI, edited by
Gerald C. Holst, David P. Haefner, Proc. of SPIE Vol. 11406, 1140601 · © 2020 SPIE
CCC code: 0277-786X/20/$21 · doi: 10.1117/12.2572633

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXXI*, edited by Gerald C. Holst, David P. Haefner, Proceedings of SPIE Vol. 11406 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SIMULATION I

11406 06 **Automated simulation-generated EO/IR image library for artificial intelligence applications (Invited Paper)** [11406-9]

11406 08 **Imager assessment by classification of geometric primitives** [11406-11]

SIMULATION II

11406 09 **Simulation of laser speckle patterns generated by random rough surfaces** [11406-14]

11406 0A **Artificial intelligence supported material design for tailored image transformations** [11406-15]

MODELING I

11406 0C **Improved formulas for CSNR with an example** [11406-17]

11406 0D **Spatial misregistration in hyperspectral cameras: lab characterization and errors in real-world images** [11406-19]

MODELING III

11406 0I **Determinations of detector optical reflections** [11406-28]
