Volume 11393

Proceedings of SPIE 0277-786X, V. 11393

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Algorithms for Synthetic Aperture Radar Imagery XXVII, edited by Edmund Zelnio,
Frederick D. Garber, Proc. of SPIE Vol. 11393, 1139301 · © 2020 SPIE
CCC code: 0277-786X/20/$21 · doi: 10.1117/12.2572714

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Algorithms for Synthetic Aperture Radar Imagery XXVII*, edited by Edmund Zelnio, Frederick D. Garber, Proceedings of SPIE Vol. 11393 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SESSION 1 ADVANCED IMAGING AND 3D RECONSTRUCTION

11393 04 **Perturbation amplitude effects of power law errors on refraction autofocus** [11393-4]

11393 06 **Deep learning methods for image reconstruction from angularly sparse data for CT and SAR imaging** [11393-6]

11393 07 **A novel approach to sparse synthesis for imaging** [11393-7]

11393 09 **2D and 3D convolutional and correlation SAR imaging** [11393-9]

11393 0B **3D scene reconstruction from multi-sensor EO-SAR data** [11393-11]

SESSION 2 MACHINE-LEARNING-BASED SAR ATR

11393 0C **Review of recent advances in AI/ML using the MSTAR data** [11393-12]

11393 0D **Using deep learning to estimate linear structure orientation in polarimetric radar data** [11393-14]

11393 0J **Automatic target recognition of aerial vehicles based on synthetic SAR imagery using hybrid stacked denoising auto-encoders** [11393-20]

11393 0K **Investigating the saliency of SAR image chips** [11393-21]

SESSION 3 PERFORMANCE MODELING

11393 0N **Aerial and ground vehicles synthetic SAR dataset generation for automatic target recognition** [11393-25]

11393 0O **Hardware-accelerated SAR simulation with NVIDIA-RTX technology** [11393-26]

11393 0P **Statistical analysis of SAR signature domains** [11393-27]

11393 0T **Self-proficiency assessment for ATR systems** [11393-31]
