**Volume 11635**

Proceedings of SPIE, 1605-7422, V. 11635

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Fibers and Sensors for Medical Diagnostics, Treatment and Environmental Applications XXI  
edited by Israel Gannot, Katy Roodenko, Proc. of SPIE Vol. 11635, 1163501  
© 2021 SPIE · CCC code: 1605-7422/21/\$21 · doi: 10.1117/12.2596557

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Fibers and Sensors for Medical Diagnostics, Treatment and Environmental Applications XXI*, edited by Israel Gannot, Katy Roodenko, Proceedings of SPIE Vol. 11635 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## KEYNOTE

---

- 11635 03 **Mid-infrared sources, based on chalcogenide glass fibres, for biomedical diagnostics (Keynote Paper)** [11635-42]

---

## FIBER OPTIC SENSORS: DEVELOPMENT AND CHARACTERISATION I

---

- 11635 05 **Long-term degradation of UV fibers using broadband light sources** [11635-1]
- 11635 06 **Trends in specialty fiber optic materials: characterization and applications** [11635-2]
- 11635 0A **Characterization of a fast response fiber-optic pH sensor and measurements in a biological application** [11635-6]

---

## FIBER OPTIC SENSORS: DEVELOPMENT AND CHARACTERISATION II

---

- 11635 0E **Optimized OCT-based depth-resolved model for attenuation compensation using point-spread-function calibration** [11635-10]
- 11635 0G **Analysis and optimization of six types of two-coil inductive for the human implantable wireless electrocardiogram sensor** [11635-12]

---

## FIBER OPTIC SENSORS: DEVELOPMENT AND CHARACTERISATION III

---

- 11635 0H **Optical fiber as distributed acoustic sensing element with improved Rayleigh backscattering sensitivity and robustness under elevated temperature** [11635-13]
- 11635 0K **Quantitative analysis of acetone in breath using vacuum-ultraviolet spectroscopy based on hollow-optical-fiber gas cell** [11635-16]

---

## FIBER OPTIC SENSORS: DEVELOPMENT AND CHARACTERISATION IV

---

- 11635 0L **Fabrication of 800- $\mu$ m-bore hollow optical fibers based on completely non-fragile and flexible Ni-Ti tube for the infrared** [11635-17]
- 11635 0O **Measurement and uniformization of power distribution on the prism for biomedical applications of mid-infrared, attenuated-total-reflection spectroscopy** [11635-41]

---

#### FIBER OPTIC SENSORS: DEVELOPMENT AND CHARACTERISATION V

---

- 11635 OP **Numerical investigation of Au-silane functionalised optical fibre sensor for volatile organic compounds biomarker (VOCs) detection** [11635-20]
- 11635 OR **Wave plate based stabilization of polarization at the distal end of multimode fiber for polarization sensitive imaging systems** [11635-22]
- 11635 OS **Common path Bessel beam optical interferometry for refractive index measurement of hazardous liquid samples at 1550 nm** [11635-23]
- 11635 OT **Fluoride detection in drinking water using evanescent fiber cavity ring down spectroscopy** [11635-24]

---

#### SCANNING PROBE MICROSCOPY

---

- 11635 OU **IR laser polarimetry: breaking limits of FTIR polarimetry for thin film studies** [11635-25]
- 11635 OV **Scanning near-field infrared microscopy for biomedical imaging with a subwavelength spatial resolution** [11635-26]
- 11635 OX **Nanoscale IR spectroscopy and imaging with a versatile broadband IR laser source** [11635-28]
- 11635 OZ **Infrared scanning near-field optical microscopy (IR-SNOM) for thermal profiling of quantum cascade lasers** [11635-30]

---

#### ENVIRONMENTAL SESSION I

---

- 11635 11 **Advances of dual-comb spectroscopy based on QCL for environmental and water analysis** [11635-32]
- 11635 12 **High-throughput environmental microplastic identification and quantification using a wide-field QCL-IR based microscope** [11635-33]
- 11635 13 **Gas analysis with infrared molecular gas lasers** [11635-34]

---

#### ENVIRONMENTAL SESSION II

---

- 11635 14 **Disposable flowcell for spectroscopic analysis in bioprocesses** [11635-40]
- 11635 16 **Infrared sensors for environmental and biomedical applications** [11635-36]
