SPIE

Volume 11697

Proceedings of SPIE 0277-786X, V. 11697

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

MOEMS and Miniaturized Systems XX, edited by Hans Zappe, Wibool Piyawattanametha,
Yong-Hwa Park, Proc. of SPIE Vol. 11697, 1169701 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2596726

Proc. of SPIE Vol. 11697 1169701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *MOEMS and Miniaturized Systems XX*, edited by Hans Zappe, Wibool Piyawattanametha, Yong-Hwa Park, Proc. of SPIE 11697, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

MICRO-MIRRORS I

- 11697 03 **Photo-controlled deformable mirror for wavefront shaping (Invited Paper)** [11697-1]
- 11697 04 **A 2D circular-scanning piezoelectric MEMS mirror for laser material processing** [11697-2]
- 11697 06 **A novel closed-loop architecture for accurate micromirror trajectory control in linear scanning MEMS-based projectors** [11697-4]
- 11697 07 **Large aperture MEMS mirror with integrated piezoelectric actuator** [11697-5]

MICRO-MIRRORS II

- 11697 08 **Quasi-static PZT actuated MEMS mirror with 4x3mm² reflective area and high robustness (Invited Paper)** [11697-6]
- 11697 09 **Innovative ECDL design based on a resonant MEMS scanner for ultra-fast tuning in the MIR range** [11697-7]
- 11697 0A **A two-axis water-immersible micro scanning mirror (WIMSM) using torsional and bending polymer hinges (Best Student Paper Award)** [11697-8]
- 11697 0B **Wide-angle wide-spectral range IMI plasmonic MEMS mirror in the MIR for spectroscopic gas sensing applications** [11697-9]
- 11697 0C **Multiple MEMS mirrors synchronization techniques, modeling, and applications** [11697-10]

LIDAR I

- 11697 0D **Wide angle LiDAR demonstrator based on a resonantly operated 1D MEMS mirror capable of scanning 180° (Invited Paper, Best Paper Award)** [11697-11]
- 11697 0F **A design and manufacturing platform for AlScN based highly linear quasi-static MEMS mirrors with large optical apertures** [11697-13]
- 11697 0G **Efficient driver and high accuracy sense ASICs for piezoelectric micro-mirrors** [11697-14]

LIDAR II

- 11697 0H **Amplitude-modulated continuous wave scanning LIDAR based on parallel phase-demodulation (Invited Paper)** [11697-15]

11697 0I **Beam-steering MOEMS system based on a resonant piezoMEMS mirror and a phase-locked loop controller** [11697-16]

NOVEL OPTICAL COMPONENTS I

11697 0M **Photonic crystal MEMS emitter for chemical gas sensing** [11697-20]

11697 0N **CMOS compatible MEMS pyroelectric infrared detectors: from AlN to ScAlN** [11697-21]

11697 0O **Tunable optical filters with hybrid plasmonic-dielectric thin-films for fluorescence sensing** [11697-22]

NOVEL OPTICAL COMPONENTS II

11697 0P **Smart slit assembly employing continuously tunable MEMS shutter (Invited Paper)** [11697-23]

11697 0Q **Compact and innovative laser beam steering optical engine for smart glasses applications** [11697-24]

11697 0R **Compact detector unit based on the butterfly assembly for trace gas analysis** [11697-25]

IMAGING

11697 0V **Challenges of monolithic MEMS-on-CMOS integration for spatial light modulators** [11697-29]

POSTER SESSION

11697 14 **MEMS-based polarized FTIR spectrometer for polymer quality control** [11697-38]

11697 15 **Electro-mechanical validation of a resonant MEMS mirror with PZT actuation and PZR sensing** [11697-39]

11697 16 **Modeling and experimental verification of the impact of noise sources on projection accuracy of MEMS linear micromirrors for raster scanning applications** [11697-40]

11697 17 **On-chip structure for optofluidic sensing using stable Fabry-Pérot resonator** [11697-41]

11697 18 **A 2D electrothermal micromirror with feedback based on Hall-effect of piezoresistive sensors** [11697-42]
