Volume 11955

Proceedings of SPIE, 1605-7422, V. 11955

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Microfluidics, BioMEMS, and Medical Microsystems XX, edited by Bonnie L. Gray, Holger Becker
Proc. of SPIE Vol. 11955, 1195501 · © 2022 SPIE · 1605-7422 · doi: 10.1117/12.2635640

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Microfluidics, BioMEMS, and Medical Microsystems XX*, edited by Bonnie L. Gray, Holger Becker, Proc. of SPIE 11955, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MEDICAL DEVICES I

- 11955 02 **WRRIST: a wearable, rapid, and real-time infection screening tool for dual-mode detection of inflammatory biomarkers in sweat** [11955-4]
- 11955 03 **Design and characterization of piezoelectric actuators on flexible substrate for non-invasive, conductive hearing aids** [11955-5]
- 11955 04 **Squeeze film damping in MEMS loudspeakers: analysis of a clamped-clamped microbeam** [11955-6]

OPTOFLUIDICS I

- 11955 05 **A microfluidic mixer and illumination system for a high-throughput optical calorimeter** [11955-8]

OPTOFLUIDICS II

- 11955 06 **Enhanced fluorescent detection of nucleosomes using functionalized magnetic beads on a digital microfluidic device** [11955-26]
- 11955 07 **Advanced optical on-chip analysis of fluid flow for applications in carbon dioxide trapping** [11955-12]

DEVICES

- 11955 08 **Development of an integrated microfluidic system for monitoring patient's immunity** [11955-16]

APPLICATIONS

- 11955 09 **A biocompatible 3D printed microfluidic *C. elegans* analysis device** [11955-19]
- 11955 0A **Towards in-flow monitoring of fat content and fluid composition of dairy milk using microfluidic confocal Raman spectroscopy** [11955-20]

11955 0B **New joining and automation approaches for multilayer-based manufacturing of complex, customized microsystems [11955-27]**

MANUFACTURING I

11955 0C **High-throughput manufacturing of transparent fused silica glass by injection molding and extrusion [11955-2]**

11955 0D **Fabrication of platinum microstructures for sensors and lab-on-a-chip devices [11955-3]**

MANUFACTURING II

11955 0E **High throughput fabrication of robust solid microneedles [11955-10]**

Conference Committee

Symposium Chairs

Jennifer K. Barton, The University of Arizona (United States)
Wolfgang Drexler, Medizinische Universität Wien (Austria)

Program Track Chairs

Tuan Vo-Dinh, Duke University (United States)
Anita Mahadevan-Jansen, Vanderbilt University (United States)

Conference Chairs

Bonnie L. Gray, Simon Fraser University (Canada)
Holger Becker, microfluidic ChipShop GmbH (Germany)

Conference Co-chair

Bastian E. Rapp, Universitaet Freiburg (Germany)

Conference Program Committee

Hatice Altug, Ecole Polytechnique Fédérale de Lausanne (Switzerland)
Brian W. Anthony, Massachusetts Institute of Technology (United States)
Jaione Tirapan Azpiroz, IBM Research - Brazil (Brazil)
Colin Dalton, University of Calgary (Canada)
Yolanda Fintschenko, FounderTraction (United States)
Albert K. Henning, Aquarian Microsystems (United States)
Yu-Cheng Lin, National Cheng Kung University (Taiwan)
Yuehe Lin, Pacific Northwest National Laboratory (United States)
Ian Papautsky, University of Illinois at Chicago (United States)
Thomas Stieglitz, Albert-Ludwigs-Universitaet Freiburg (Germany)
Sindy Kam-Yan Tang, Stanford University (United States)
Hayden K. Taylor, University of California, Berkeley (United States)
Julian Thiele, Leibniz-Institut für Polymerforschung Dresden e.V.
(Germany)
Bernhard H. Weigl, Intellectual Ventures Management, LLC
(United States)
