

# PROCEEDINGS OF SPIE

## ***Third International Conference on Algorithms, Microchips, and Network Applications (AMNA 2024)***

**Joan Lu**  
**Reggie Davidrajuh**  
*Editors*

**8–10 March 2024**  
**Jinan, China**

*Organized by*  
Nanchang University (China)

*Sponsored by*  
University of Huddersfield (United Kingdom)  
AEIC—Academic Exchange Information Centre (China)

*Published by*  
SPIE

**Volume 13171**

Proceedings of SPIE 0277-786X, V. 13171

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Third International Conference on Algorithms, Microchips, and Network Applications (AMNA 2024),  
edited by Joan Lu, Reggie Davidrajuh, Proc. of SPIE Vol. 13171, 1317101  
© 2024 SPIE · 0277-786X · doi: 10.1117/12.3034226

Proc. of SPIE Vol. 13171 1317101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *Third International Conference on Algorithms, Microchips, and Network Applications (AMNA 2024)*, edited by Joan Lu, Reggie Davidrajuh, Proc. of SPIE 13171, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## HIGH PERFORMANCE ALGORITHM AND DATA MODELING

---

- 13171 02 **Towards recognition of open-set speech forgery algorithms by using prototype learning**  
[13171-19]
- 13171 03 **A greedy online 3D bin packing algorithm based on multi-indicator fusion** [13171-8]
- 13171 04 **Evolution simulation of spatial spillover effect of carbon emission efficiency based on improved PSO-PFCM clustering algorithm** [13171-101]
- 13171 05 **The shortest path algorithm for urban rail transit based on spatio-temporal accessibility**  
[13171-12]
- 13171 06 **Allreduce algorithm optimization of OpenMPI communication library** [13171-30]
- 13171 07 **Lightweight Siamese object tracking algorithm based on SiamBAN** [13171-80]
- 13171 08 **Improved A\* algorithm for path planning in dynamic environments** [13171-63]
- 13171 09 **Research on energy management of building operation and maintenance based on multiple prediction algorithms** [13171-21]
- 13171 0A **A local flooding-based survivable routing algorithm for mega-constellations networks with inclined orbits** [13171-94]
- 13171 0B **Research on HOV lane route layout method based on heuristic algorithm** [13171-50]
- 13171 0C **A distributed on-demand routing algorithm for large-scale low Earth orbit constellation**  
[13171-23]
- 13171 0D **Exploiting sequence characteristics for long-term workload prediction in cloud data centers**  
[13171-97]
- 13171 0E **DOA estimation based on mode and maximum eigenvector algorithm with reverberation environment** [13171-93]
- 13171 0F **A lightweight car damage detection algorithm** [13171-5]
- 13171 0G **A privacy preserving carbon quota trading and auditing method** [13171-72]

- 13171 OH **TCSE-ResNet50 mixed-signal identification algorithm for joint spectrum and quartic spectrum** [13171-43]
- 13171 OI **Research on speed profile generation of train automatic driving planning based on improved genetic algorithm** [13171-65]
- 13171 OJ **An efficient 3D point cloud classification approach via persistent homology** [13171-68]
- 13171 OK **Research on infrared optical CO detection based on BP neural network algorithm** [13171-100]
- 13171 OL **Image denoising algorithm based on self-attention residual network** [13171-4]
- 13171 OM **Research on multisource heterogeneous data structure analysis technique based on AI security detection algorithm** [13171-103]
- 13171 ON **Multidomain A\* algorithm research** [13171-18]
- 13171 OO **The [1,2]-set properties and algorithm analysis of tree** [13171-6]
- 13171 OP **Analysis of a model algorithm for calculating object projection length** [13171-14]
- 13171 OQ **Timing algorithm design based on digital twin airport** [13171-36]
- 13171 OR **Multiagent scheduling based on three-dimensional time window** [13171-37]
- 13171 OS **Research on secure and trustworthy cross domain collaborative computing methods for data** [13171-83]
- 13171 OT **A hybrid algorithm of particle swarm optimization and genetic algorithm with application in automatic replenishment model** [13171-34]

---

**ELECTRONIC INSTRUMENTATION RESEARCH AND TARGET DETECTION**

- 13171 OU **Research on KG and LLM knowledge-enhanced pediatric diseases intelligent diagnosis** [13171-78]
- 13171 OV **High-efficiency silicon modulator of horizontal S-shaped profile** [13171-2]
- 13171 OW **A delay line interpolation time interval measurement technique based on Lidar system** [13171-88]
- 13171 OX **Multitarget vital signs detection by fusing radar and optical images** [13171-60]
- 13171 OY **Ground-based high-precision local positioning using single-difference carrier phase and sparse ranging model** [13171-15]

- 13171 0Z **A low-complexity FMCW-SAR imaging system and moving target detection method** [13171-3]
- 13171 10 **EA-VBF, an underwater acoustic sensor network protocol that balances node residual energy and packet relay count** [13171-11]
- 13171 11 **Advanced deep-learning-based chip design enabling algorithmic and hardware architecture convergence** [13171-85]
- 13171 12 **Multi-UAV tracking target in urban environments by model predictive control and improved whale optimizer** [13171-47]
- 13171 13 **Research on automatic checking method of power anomaly data based on chaotic sequence** [13171-56]
- 13171 14 **Distance measure based on geometric compression of Pythagorean fuzzy sets** [13171-48]
- 13171 15 **Design of indoor formaldehyde multipoint real-time monitoring and alarm system** [13171-87]
- 13171 16 **Wavelength design and optical axis correction for bidirectional underwater laser communication with ATP** [13171-96]
- 13171 17 **Design and implementation of an electromagnetic tracing intelligent vehicle based on STC32** [13171-95]
- 13171 18 **Analysis of routing algorithm for smart grid optical communication network based on cloud computing** [13171-81]
- 13171 19 **Research on haze prediction method of Xianyang City based on STL decomposition and FEDformer** [13171-32]
- 13171 1A **Radar signal detection under low SNR using stacked auto-encoder and time-frequency domain features** [13171-71]
- 13171 1B **An improved credit-based shaper for TSN** [13171-44]
- 13171 1C **An advanced encryption standard framework for coarse-grained reconfigurable processor** [13171-45]
- 13171 1D **Detection of ultrashort wave broadband satellite signal based on overlay spectrum and SST YOLOV5s** [13171-7]
- 13171 1E **M-LAB: scheduling space exploration of multitasks on tiled deep learning accelerators** [13171-67]
- 13171 1F **Coordinated scheduling optimisation strategy of mining equipment in underground coal mines** [13171-64]
- 13171 1G **Optimization method for rapid emergency recovery of power failure in distribution network based on multiagent algorithm** [13171-54]

- 13171 1H **NGA-Net: an ECG waveform segmentation algorithm based on semisupervised learning** [13171-10]
- 13171 1I **Design of an efficient hybrid cache coherence protocol on chiplet architecture** [13171-29]

---

**INTERNET OF THINGS SYSTEM DESIGN AND NETWORK OPTIMIZATION METHOD**

---

- 13171 1J **Comprehensive design of a distributed intelligent unmanned shipborne radar system** [13171-102]
- 13171 1K **Semantic code clone detection based on BERT pre-trained model** [13171-13]
- 13171 1L **DRLMS: a multipath scheduler based on deep reinforcement learning** [13171-27]
- 13171 1M **Research on WebShell encrypted communication detection based on machine learning** [13171-74]
- 13171 1N **Fusing lightweight Retinaface network for fatigue driving detection** [13171-20]
- 13171 1O **Design and implementation of data acquisition system based on LabVIEW** [13171-66]
- 13171 1P **Cost-aware service function chain migration in satellite-ground integrated networks** [13171-35]
- 13171 1Q **Network communication optimization of RCCL communication library in multi-NIC systems** [13171-28]
- 13171 1R **SP-ADMM: a distributed optimization method of SFC placement for 5G-MEC networks** [13171-22]
- 13171 1S **Protocol-based non-invasive Modbus monitoring device for industrial Internet of Things data sharing** [13171-69]
- 13171 1T **Requirement analysis of remote conference system based on qualitative and quantitative analysis combination** [13171-46]
- 13171 1U **MSSF-DCNet: multiscale selective fusion with dense connectivity network for sonar image object detection** [13171-92]
- 13171 1V **APSN: adaptive prediction sample network in Deep Q learning** [13171-16]
- 13171 1W **Towards a container scheduling policy for alleviating total startup latency in serverless computing platform** [13171-49]
- 13171 1X **GoPlace: chip placement like playing go** [13171-86]
- 13171 1Y **Passive traffic analysis based on resource occupancy of mobile communication uplink control channel** [13171-9]

- 13171 1Z **LoRA-SP: streamlined partial parameter adaptation for resource efficient fine-tuning of large language models** [13171-55]
- 13171 20 **A directional MAC protocol for marine ship ad-hoc networks** [13171-61]
- 13171 21 **Research on offloading strategies for mobile edge computing in ultradense networks** [13171-77]
- 13171 22 **Tabu-based adaptive large neighborhood search aids irregular reconfigurable intelligent surface capacity enhancement** [13171-59]
- 13171 23 **Machine-learning-based classification method for millimeter wave indoor channel at 28 GHz** [13171-31]
- 13171 24 **Research on netizen sentiment recognition based on multimodal deep learning** [13171-99]
- 13171 25 **Short text sentiment analysis combining sentiment lexicon and graph convolutional networks** [13171-62]
- 13171 26 **Enhancing entity resolution with multichannel BERT: a comprehensive approach** [13171-17]
- 13171 27 **Research on intelligent botnet defense and analysis technology based on dynamic adversarial models** [13171-41]
- 13171 28 **GNAR: graph contrastive learning networks with adaptive readouts for anomaly detection** [13171-42]

# Conference Committee

## *Conference Chairs*

**Reggie Davidrajuh**, University of Stavanger (Norway)  
**Witold Pedrycz**, University of Alberta (Canada)

## *Technical Program Committee Chairs*

**Edmund Lai**, Auckland University of Technology (New Zealand)  
**Abdel Hamid Soliman**, Technologies and Arts Staffordshire University  
(United Kingdom)

## *Publication Chair*

**Joan Lu**, University of Huddersfield (United Kingdom)

## *Organizing Committee*

**Shuanghua Yang**, Southern University of Science and Technology  
(China)  
**Bo Zhao**, Shaanxi Fashion Engineering University (China)  
**Nada M. Al Hakkak**, Baghdad College for Economic Science  
University (Iran, Islamic Republic of)  
**Sahil Verma**, Lovely Professional University (India)  
**Lisu Yu**, Nanchang University (China)  
**Xiaohao Cai**, University of Southampton (United Kingdom)  
**Dimitrios Kollias**, University of Greenwich (United Kingdom)  
**Ayush Dogra**, CSIR-NPDF, CSIR-CSIO (Government of India) (India)  
**Ariffin Nor Hapiza**, Universiti Teknologi Mara (Malaysia)

## *Academic Committee*

**Badrul Hisham bin Ahmad**, Universiti Teknikal Malaysia Melaka  
(Malaysia)  
**Tao Wang**, Sun Yat-Sen University (China)  
**Kejun Li**, Shandong University (China)  
**Hicham Medromi**, University of Hassan II Casablanca (Morocco)  
**Mohamed Said Mahmoud**, China National Pulp and Paper Research  
Institute (China)  
**Surej Rajan C.**, Toc H Institute of Science and Technology (India)  
**Mamoun Alazab**, Charles Darwin University (Australia)  
**Qiang Xu**, University of Huddersfield (United Kingdom)
