

PROCEEDINGS OF SPIE

Quantum Information and Computation X

**Eric Donkor
Andrew R. Pirich
Howard E. Brandt**
Editors

**26–27 April 2012
Baltimore, Maryland, United States**

Sponsored and Published by
SPIE

Volume 8400

Proceedings of SPIE, 0277-786X, v. 8400

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Quantum Information and Computation X, edited by Eric Donkor, Andrew R. Pirich, Howard E. Brandt,
Proc. of SPIE Vol. 8400, 840001 · © 2012 SPIE · CCC code: 0277-786X/12/\$18 · doi: 10.1117/12.979488

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Quantum Information and Computation X*, edited by Eric Donkor, Andrew R. Pirich, Howard E. Brandt, Proceedings of SPIE Vol. 8400 (SPIE, Bellingham, WA, 2012) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, lighter font. To the right of the text is a stylized graphic consisting of four vertical bars of increasing height from left to right, with a curved line above them.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

SESSION 1 QUANTUM IMAGING, SENSING, AND MEASUREMENT

- 8400 02 **Probing correlation in quantum arrays** [8400-01]
T. J. Yoder, Franklin & Marshall College (United States); M. R. Frey, Bucknell Univ. (United States)
- 8400 04 **Manipulations of cold atoms on a chip: double well potential and 1D Bose gas** [8400-03]
J. Alexander, V. Prieto, C. Rowlett, W. Golding, P. Lee, U.S. Army Research Lab. (United States)
- 8400 05 **Optical frequency combs for atomic quantum control on atom chips** [8400-04]
Q. Quraishi, V. S. Malinovsky, J. Alexander, V. Prieto, C. Rowlett, P. Lee, U.S. Army Research Lab. (United States)
- 8400 06 **Spectroscopy of a deterministic single-donor device in silicon** [8400-05]
M. Fuechsle, J. A. Miwa, S. Mahapatra, The Univ. of New South Wales (Australia); H. Ryu, S. Lee, Purdue Univ. (United States); O. Warschkow, The Univ. of Sydney (Australia); L. C. L. Hollenberg, The Univ. of Melbourne (Australia); G. Klimeck, Purdue Univ. (United States); M. Y. Simmons, The Univ. of New South Wales (Australia)
- 8400 07 **Phonons in a double-well: transverse vibrations in a pair of trapped ions** [8400-06]
P. J. Lee, U.S. Army Research Lab. (United States)

SESSION 2 QUANTUM KEY DISTRIBUTION AND CRYPTOGRAPHY

- 8400 09 **LDPC error correction in the context of quantum key distribution** [8400-08]
A. Nakassis, A. Mink, National Institute of Standards and Technology (United States)
- 8400 0B **Thwarting the photon number splitting attack with entanglement enhanced BB84 quantum key distribution** [8400-10]
C. F. Sabottke, C. D. Richardson, P. M. Anisimov, Louisiana State Univ. (United States); U. Yurtsever, Louisiana State Univ. (United States) and MathSense Analytics (United States); A. Lamas-Linares, National Univ. of Singapore (Singapore); J. P. Dowling, Louisiana State Univ. (United States)

SESSION 3 QUANTUM BITS AND LOGIC GATES

- 8400 0C **Szilard engine reversibility as quantum gate function** [8400-11]
F. M. Mihelic, The Univ. of Tennessee (United States)

SESSION 4 QUANTUM COMPUTING

- 8400 OI **Finsler metrics in quantum circuit optimization** [8400-17]
H. E. Brandt, U.S. Army Research Lab. (United States)
- 8400 OK **Study of improved semantics on quantum elements and programmable architecture**
[8400-19]
N. Wu, F. Song, Nanjing Univ. (China); X. Li, The City Univ. of New York (United States) and
New York City College of Technology (United States)
- 8400 OL **A multilayer three-dimensional superconducting nanowire photon detector** [8400-40]
A. M. Smith, Air Force Research Lab. (United States)
- 8400 OM **Generalized Donkor model with induced dipole-dipole forbidden transitions using Maple**
[8400-21]
C. Jaramillo Correa, Univ. EAFIT (Colombia)
- 8400 ON **All optical XOR, CNOT gates with initial insight for quantum computation using linear optics**
[8400-22]
O. Shehab, Univ. of Maryland, Baltimore County (United States)

SESSION 5 QUANTUM INFORMATION THEORY I

- 8400 OO **Quantum system decomposition for the semi-classical quantum Fourier transform** [8400-24]
B. Greco, Clemson Univ. (United States); J. Lenahan, Imagine One Corp. (United States);
S. Huerth, Space and Naval Warfare Systems Ctr. Atlantic (United States); J. Medlock,
Oregon State Univ. (United States); L. A. Overbey, Space and Naval Warfare Systems Ctr.
Atlantic (United States)
- 8400 OP **Freedom of choice in tracking an atomic resonance** [8400-25]
J. M. Myers, F. H. Madjid, Harvard School of Engineering and Applied Sciences (United
States)
- 8400 OQ **Battle of the sexes game analysis using Yang-Baxter operator as quantum gate** [8400-26]
J. M. López R., Univ. EAFIT (Colombia)
- 8400 OR **Strictly discordant quantum probes of the qubit depolarizing channel** [8400-27]
M. R. Frey, Bucknell Univ. (United States); T. J. Yoder, Franklin & Marshall College (United
States)
- 8400 OS **A geometric view of quantum cellular automata** [8400-28]
J. R. McDonald, P. M. Alsing, Air Force Research Lab. (United States); H. A. Blair, Syracuse
Univ. (United States)
- 8400 OT **Local availability of mathematics and number scaling: effects on quantum physics**
[8400-23]
P. Benioff, Argonne National Lab. (United States)

SESSION 6 QUANTUM INFORMATION THEORY II

- 8400 0V **Quantum algorithms for the Jones polynomial and Khovanov homology** [8400-30]
L. H. Kauffman, Univ. of Illinois at Chicago (United States); S. J. Lomonaco, Jr., Univ. of Maryland, Baltimore County (United States)
- 8400 0W **Possible universal quantum algorithms for generalized Khovanov homology and the Rasmussen's invariant** [8400-31]
M. Vélez, J. Ospina, Univ. EAFIT (Colombia)
- 8400 0X **Applications of the Yang-Baxter-Rowell equation to topological quantum computation** [8400-32]
A. Arnedo León, Univ. EAFIT (Colombia)

SESSION 7 QUANTUM ENTANGLEMENT

- 8400 0Y **Nonlocality, entanglement witnesses, and supra-correlations** [8400-33]
P. M. Alsing, J. R. McDonald, Air Force Research Lab. (United States)
- 8400 0Z **A multipli-entangled photon source for cluster state generation** [8400-34]
C. J. Peters, M. L. Fanto, P. M. Alsing, A. M. Smith, T. P. Genda, Air Force Research Lab. (United States); R. K. Erdmann, Advanced Automation Corp. (United States); E. J. Galvez, Colgate Univ. (United States)
- 8400 11 **Generation, detection, and applications of quantum hyper-entangled and entangled states** [8400-36]
J. F. Smith III, U.S. Naval Research Lab. (United States)
- 8400 12 **Nonlocal realism considered for entangled photons** [8400-37]
R. Erdmann, Advanced Automation Corp. (United States); M. Fanto, C. Peters, P. Alsing, R. Michalak, Air Force Research Lab. (United States); Enrique Galvez, Colgate Univ. (United States)
- 8400 13 **Generating and storing nonclassical correlations in a warm Rb vapor cell with buffer gas** [8400-38]
M. Bashkansky, F. K. Fatemi, I. Vurgaftman, U.S. Naval Research Lab. (United States)

POSTER SESSION

- 8400 15 **Theory and experimental requirements of imperfect two-qubit linear optical photonic gates** [8400-20]
A. M. Smith, Tulane Univ. (United States) and Air Force Research Lab. (United States);
D. B. Uskov, Tulane Univ. (United States) and Brescia Univ. (United States); M. Fanto, Air Force Research Lab. (United States); L. Ying, L. Kaplan, Tulane Univ. (United States)

Author Index

Conference Committee

Symposium Chair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Symposium Cochair

Kenneth R. Israel, Lockheed Martin Corporation (United States)

Conference Chairs

Eric Donkor, University of Connecticut (United States)

Andrew R. Pirich, ACP Consulting (United States)

Howard E. Brandt, U.S. Army Research Laboratory (United States)

Program Committee

Paul M. Alsing, Air Force Research Laboratory (United States)

Reinhard K. Erdmann, Air Force Research Laboratory (United States)

Michael R. Frey, Bucknell University (United States)

Michael J. Hayduk, Air Force Research Laboratory (United States)

Louis H. Kauffman, University of Illinois at Chicago (United States)

Vladimir E. Korepin, Stony Brook University (United States)

Samuel J. Lomonaco, Jr., University of Maryland, Baltimore County
(United States)

John M. Myers, Harvard University (United States)

Alexander V. Sergienko, Boston University (United States)

Tai Tsun Wu, Harvard University (United States)

Session Chairs

- 1 Quantum Imaging, Sensing, and Measurement
Andrew R. Pirich, ACP Consulting (United States)
Howard E. Brandt, U.S. Army Research Laboratory (United States)
- 2 Quantum Key Distribution and Cryptography
Eric Donkor, University of Connecticut (United States)
John M. Myers, Harvard University (United States)
- 3 Quantum Bits and Logic Gates
Michael R. Frey, Bucknell University (United States)
Louis H. Kauffman, University of Illinois at Chicago (United States)

- 4 Quantum Computing
Samuel J. Lomonaco, Jr., University of Maryland, Baltimore County
(United States)
Reinhard K. Erdmann, Air Force Research Laboratory (United States)
- 5 Quantum Information Theory I
Paul M. Alsing, Air Force Research Laboratory (United States)
Michael J. Hayduk, Air Force Research Laboratory (United States)
- 6 Quantum Information Theory II
Eric Donkor, University of Connecticut (United States)
Andrew R. Pirich, ACP Consulting (United States)
- 7 Quantum Entanglement
Howard E. Brandt, U.S. Army Research Laboratory (United States)
John M. Myers, Harvard University (United States)
