SPIE

Volume 7682

Proceedings of SPIE, 0277-786X, v. 7682

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Photonic Microdevices/Microstructures for Sensing II*, edited by Xudong Fan, Hai Xiao, Anbo Wang, Proceedings of SPIE Vol. 7682 (SPIE, Bellingham, WA, 2010) Article CID Number.

ISSN 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a similar font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height, resembling a barcode or a signal waveform.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

SESSION 1 MICROPHOTONIC PLASMONIC SENSORS I

- 7682 03 **Photonic materials for encoding and detection of biomolecules (Invited Paper)** [7682-02]
Y. Zhao, X. Zhao, Southeast Univ., Nanjing (China); Z. Gu, Southeast Univ. (China) and Suzhou
Research Institute of Southeast Univ. (China)

SESSION 2 MICROPHOTONIC IN-LINE DEVICES AND SENSORS I

- 7682 05 **In-line devices and sensors based on air-silica microstructure optical fibers (Invited Paper)**
[7682-04]
W. Jin, L. Jin, S. Liu, Y. L. Hoo, J. Ju, H. L. Ho, The Hong Kong Polytechnic Univ. (Hong Kong,
China)
- 7682 07 **Characteristics and application of phase-shifted long-period fiber grating fabricated by
CO₂ laser** [7682-06]
H. Duan, X. Lan, T. Wei, Y. Zhang, H. Xiao, Missouri Univ. of Science and Technology (United
States)

SESSION 3 MICROPHOTONIC FLUIDICS AND RESONATORS I

- 7682 09 **Detection of HER2 breast cancer biomarker using the optofluidic ring resonator biosensor**
[7682-08]
J. T. Gohring, Univ. of Missouri, Columbia (United States); P. S. Dale, Ellis Fischel Cancer Ctr.,
Univ. of Missouri, Columbia (United States); X. Fan, Univ. of Missouri, Columbia (United States)
and Univ. of Michigan (United States)
- 7682 0A **Optical detection of nanoparticles by mode splitting in whispering-gallery-mode
microcavities** [7682-09]
J. Zhu, S. K. Ozdemir, L. He, D.-R. Chen, L. Yang, Washington Univ. in St. Louis (United States)

SESSION 4 MICROPHOTONIC FLUIDICS AND RESONATORS II

- 7682 0B **On-chip single nanoparticle detection using ultra-high-Q whispering gallery microresonator
(Invited Paper)** [7682-10]
L. Yang, J. Zhu, S. K. Ozdemir, L. He, Y. Xiao, L. Li, D.-R. Chen, Washington Univ. in St. Louis
(United States)
- 7682 0C **Ultra-sensitive label-free biosensing by using single-mode coupled microcavity laser
(Invited Paper)** [7682-11]
L. Xu, H. Li, X. Wu, L. Shang, L. Liu, Fudan Univ. (China)

7682 0D **An enhanced biosensing model in coupled optical microresonators** [7682-12]
Y.-F. Xiao, Peking Univ. (China); L. Yang, Washington Univ. in St. Louis (United States)

7682 0E **Fiber-tip resonator excited by radiation pressure and photo-thermal effect** [7682-13]
C. Ma, A. Wang, Virginia Polytechnic Institute and State Univ. (United States)

SESSION 5 MICROPHOTONIC PLASMONIC SENSORS II

7682 0F **Parallel microfluidic arrays for SPRi detection (Invited Paper)** [7682-14]
E. Ouellet, The Univ. of British Columbia (Canada); C. Lausted, Institute for Systems Biology (United States); T. Lin, C.-W. Yang, The Univ. of British Columbia (Canada); L. Hood, Institute for Systems Biology (United States); E. T. Lagally, The Univ. of British Columbia (Canada)

SESSION 6 MICROPHOTONIC IN-LINE DEVICES AND SENSORS II

7682 0J **Gas detection techniques with fiber optical spectrum absorption at near-IR wavelength (Invited Paper)** [7682-18]
T. Liu, K. Liu, J. Jiang, Tianjin Univ. (China); G. Peng, The Univ. of New South Wales (Australia); Y. Wang, D. Jia, H. Zhang, Tianjin Univ. (China); W. Jing, The Univ. of New South Wales (Australia); Y. Zhang, Tianjin Univ. (China)

7682 0K **Side-coupled optical fiber devices for sensing applications** [7682-19]
Y. Zhang, X. Lan, T. Wei, H. Duan, H. Xiao, Missouri Univ. of Science and Technology (United States)

SESSION 7 MICROPHOTONIC IN-LINE DEVICES AND SENSORS III

7682 0L **Proton conducting perovskite-type ceramics for fiber optic sensors for hydrogen monitoring at high temperature** [7682-20]
X. Tang, K. Remmel, D. Sandker, Z. Xu, J. Dong, Univ. of Cincinnati (United States)

7682 0M **Strain and sonar detection with lithium niobate coated core fiber** [7682-21]
M. Bansal, P. Kornreich, D. Negussey, J. Flattery, J. Mandel, Syracuse Univ. (United States); R. Drake, Acrolite Inc. (United States)

SESSION 8 BIO-INSPIRED/BIOMIMETIC SENSOR TECHNOLOGY

7682 0N **Enhanced directional sensitivity of a biomimetic MEMS acoustic localization sensor** [7682-22]
D. Gee, U.S. Army Research Lab. (United States); H. Liu, Univ. of Maryland, College Park (United States); L. Currano, U.S. Army Research Lab. (United States); M. Yu, Univ. of Maryland, College Park (United States)

7682 0O **Performance analysis of a high-resolution wide-angle foveated optical system** [7682-23]
G. Curatu, Curatu Optics (United States); J. E. Harvey, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)

7682 OP **Soldier sensor** [7682-26]
D. P. Kossives, Clear Align (United States)

SESSION 9 INTEGRATED MICRODEVICES SENSORS

7682 OT **High-power pulsed 976-nm DFB laser diodes** [7682-30]
W. Zeller, nanoplus GmbH (Germany); M. Kamp, Julius-Maximilians-Univ. Würzburg (Germany); J. Koeth, nanoplus GmbH (Germany); L. Worschech, Julius-Maximilians-Univ. Würzburg (Germany)

POSTER SESSION

7682 OU **SDM propagation model for multiple channels using electromagnetic theory and vortex analysis** [7682-31]
S. H. Murshid, E. Zahir, R. Biswas, A. Chakravarty, Florida Institute of Technology (United States)

7682 OV **SDM propagation model for multiple channels using ray theory** [7682-32]
S. H. Murshid, E. Zahir, A. Chakravarty, Florida Institute of Technology (United States)

7682 OW **An investigation of real-time high-speed multichannel fiber Bragg grating monitoring system** [7682-33]
T. Liu, T. Xu, L. Li, J. Jiang, K. Liu, J. Han, M. He, Tianjin Univ. (China)

7682 OX **Microstructured optical fiber for simultaneous measurement of refractive index and temperature** [7682-34]
P. Lu, L. Men, K. Sooley, Q. Chen, Memorial Univ. of Newfoundland (Canada)

Author Index

Conference Committee

Symposium Chair

Michael T. Eismann, Air Force Research Laboratory (United States)

Symposium Cochair

William Jeffrey, HRL Laboratories, LLC (United States)

Conference Chairs

Xudong Fan, University of Michigan (United States)

Hai Xiao, Missouri University of Science and Technology (United States)

Anbo Wang, Virginia Polytechnic Institute and State University (United States)

Program Committee

Brian T. Cunningham, University of Illinois at Urbana-Champaign (United States)

Junhang Dong, University of Cincinnati (United States)

Henry H. Du, Stevens Institute of Technology (United States)

Erica Forzani, Arizona State University (United States)

Susan M. Maley, U.S. Department of Energy (United States)

Gary Pickrell, Virginia Polytechnic Institute and State University (United States)

Radislav A. Potyrailo, GE Global Research (United States)

Venkataraman S. Swaminathan, U.S. Army Armament Research, Development and Engineering Center (United States)

Sharon M. Weiss, Vanderbilt University (United States)

Ian M. White, University of Maryland, College Park (United States)

John X. J. Zhang, The University of Texas at Austin (United States)

Yibing Zhang, ExxonMobil Research and Engineering Company (United States)

Mohammed M. Zourob, Biophage Pharma Inc. (Canada)

Session Chairs

- 1 Microphotonic Plasmonic Sensors I
Xudong Fan, University of Michigan (United States)
- 2 Microphotonic In-Line Devices and Sensors I
Hai Xiao, Missouri University of Science and Technology (United States)

- 3 Microphotonic Fluidics and Resonators I
Erica Forzani, Arizona State University (United States)
- 4 Microphotonic Fluidics and Resonators II
Frank Vollmer, Harvard University (United States)
- 5 Microphotonic Plasmonic Sensors II
Alexandre G. Brolo, University of Victoria (Canada)
- 6 Microphotonic In-Line Devices and Sensors II
Yibing Zhang, ExxonMobil Research and Engineering Company
(United States)
- 6A Microphotonic In-Line Devices and Sensors III
Yibing Zhang, ExxonMobil Research and Engineering Company
(United States)
- 7 Bio-inspired/Biomimetic Sensor Technology
Venkataraman S. Swaminathan, U.S. Army Armament Research,
Development and Engineering Center (United States)
- 8 Integrated Microdevices Sensors
Ian M. White, University of Maryland, College Park (United States)
